SUMMARY

Computer Science Engineer with keen interest in technology and innovation. Seeking challenges with willingness to fit into new environments in order to be an effective contributor towards organizational objectives. Equipped with problem-solving skills and sound interpersonal skills to ensure quality output.

EDUCATION

SDM Institute of Technology, Ujire, Dakshina Kannada Bachelor of Engineering (UG/BE) CGPA: 8.61	Dec 2022 – May 2026
Karnataka Public School, Bidkalkatte, Kundapura 12TH/PUC Percentage: 92.8%	Sep 2021 – Apr 2022
Morarji Desai English Medium Residential School, Koteshwara 10TH Percentage: 90.4%	Jun 2019 – Jul 2020

SKILLS

- **Languages:** JavaScript, Java, C Programming
- **Frontend:** React.js, React Native, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, SQL
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Computer Networks, Operating Systems
- **Tools/Others:** Git, GitHub, Firebase, Google Colab, Redux Toolkit, Postman, Machine Learning

EXPERIENCE

Freelance Full Stack Developer Project: E-commerce Application

- Created an e-commerce application that includes a responsive admin dashboard to manage products and orders.
- Developed the frontend using **React Native** framework, including **Tailwind CSS** for creating responsive and interactive User Interface (UI).
- Used **Redux Toolkit** for managing state.
- Designed back-end API using **Node.js**, **Express.js**.
- Used **MongoDB** for database transactions.
- Used **Cloudinary** to store and handle images.
- Ensured a good user experience for customers.

Tech Stack: React Native, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MongoDB, Cloudinary

MERN Stack Intern Genesis Training and Consulting Services Pvt. Ltd.

- **Time Period:** 15 Weeks
- Participated in a 15-week internship program that included full-stack development using the MERN stack
- Worked on developing web applications using **MongoDB**, **Express.js**, **React.js**, and **Node.js**
- Designed and implemented RESTful APIs in addition to incorporating them into frontend applications
- Obtained hands-on training in database designing and backend development
- Collaborated on projects and improved debugging and problem-solving skills

PROJECTS

AI-Powered Climate Based Agriculture Platform

Aug 2025 – Nov 2025

[GitHub](#) | [Live Demo](#)

- Created an AI powered agriculture platform with real-time weather intelligence, climate risk analysis, crop recommendations, soil analytics, crop disease detection, and current market prices for sustainable farming.
- Created machine learning models for crop disease detection and used Groq LLM for creating AI insights on climate risk analysis, weather intelligence, Agricultural chatbot, and climate intelligence.
- Integrated secure authentication using JWT, Google OAuth, and Facebook OAuth.

Tech Stack: MERN Stack, Python ML, Random Forest, Tensorflow, Groq LLM, Hugging Face, Google Colab, Google OAuth, Facebook OAuth, OpenStreetMap API, OpenMeteo API, Vercel

Smart Healthcare Assistance Platform

Dec 2025 – Dec 2025

[GitHub](#) | [Live Demo](#)

- Developed a full-stack healthcare assistance web application that locates nearby hospitals and medical stores via Google Maps integration.
- Incorporated disease management with features like symptom tracker, personal recovery tips, diet plan for today, AI-powered healthcare chatbot, MediVault with medicine details, and consultation with experts.
- Created an admin dashboard which is fully responsive for user and doctor management and uses Google OAuth for security.

Tech Stack: MERN stack, Tailwind CSS, Google OAuth, Google Maps API, Vercel, Render

AI-Powered Local Service Booking Platform

Feb 2026 – May 2026

[GitHub](#) | [Live Demo](#)

- Created a full-stack multi-role service marketplace with separate User, Provider and Admin interfaces for ease of service browsing, booking and management.
- Included AI-based service recommendation, provider summary by AI and an intelligent chatbot using Groq LLM.
- Other features include JWT and OTP authentication, provider verification, booking flows, worker allocation, tracking and admin/provider dashboard along with Cloudinary integration.

Tech Stack: React, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS, JWT, Cloudinary, Brevo, Groq LLM, Vercel

CERTIFICATIONS

- **Database and SQL** – Coursera (May 2024 – Jun 2024)
- **Full-stack development using React.js** – SDMIT Ujire (Oct 2024)
- **Soft Skills** – NPTEL (Aug 2025 – Oct 2025)
- **Web Design Courses** – Infosys Springboard (Nov 2024 – Dec 2024)

HOBBIES

- Web development and learning about new technology trends.
- Sketching and drawing.
- Listening to music.
